

## Trustee:

### **Dr Georgia Mitrousia**

Dr Georgia Mitrousia is a passionate advocate for inspiring young people to pursue careers in Science, Technology, Engineering, and Mathematics (STEM), by also actively being a STEM Ambassador. As a board member of STEMPOINT, she is dedicated to promoting STEM and making science accessible to the next generation.

In her role at Rothamsted Research as an Impact and Engagement Manager Georgia plays a key part in facilitating public engagement and knowledge exchange opportunities that help bridge the gap between scientists, students, educators, and the wider community. By translating complex research into practical, engaging formats, she helps to spark interest in STEM subjects and demonstrate how science can solve global challenges.

Through her involvement with key stakeholder organizations and her active participation in STEM-related events, Georgia champions the importance of making science both exciting and accessible. Whether developing partnerships, creating and participating at events or producing interactive displays or educational materials, she plays a crucial role in showcasing the possibilities of STEM careers and inspiring the next generation. Her dedication to public engagement and her ability to translate scientific research into compelling narratives help inspire young people to see themselves as future contributors to the world of science and technology.
